

AW AUTOMOTIVE · Max-Planck-Str. 23 · 06796 Sandersdorf-Brehna

QUESTIONNAIRE

PowerCube

Deployment · Site Assessment · Configuration

Thank you for your interest in the AW PowerCube. Please complete this questionnaire as fully as possible. Your information supports the technical design, the site assessment and the commercial configuration, and enables us to prepare a tailored offer for you.

Customer / Company	
Site	
Contact person	
Date	

INSTRUCTIONS FOR COMPLETION

- Please attach technical documents, grid operator information, load profiles, PV data sheets and existing charging infrastructure plans, if available.
- If individual details are not yet available, please enter "being clarified" and state the expected date of availability.
- For multiple sites, please complete a separate questionnaire for each site.
- Please state all power figures in kW, kVA, kWh or kWp where possible.

1

CUSTOMER DATA AND CONTACT PERSONS

Company / legal name	
Billing address	Street, postcode, city, country
Technical contact	Name, role, phone, email

If an external electrical contractor is involved

If the electrical implementation is carried out by an external electrical contractor, please provide the company and contact details below.

Company name	Legal name of the electrical contractor
Company address	Street, postcode, city
Contact person	Name, role
Phone	
Email	

Commercial contact	Name, role, phone, email
Desired project timeline	e.g. offer phase, installation, commissioning

2

POWERCUBE SITE

Address of the intended site	Street, number, postcode, city
Coordinates	Latitude / longitude, if available
Planned installation area	Indoor / outdoor, paved surface, available dimensions
Access and maneuvering area	Accessibility for transport, crane, trucks, service vehicles
Special site conditions	e.g. fire protection, noise control, permits, security zone

3

GRID CONNECTION AND GRID OPERATOR

Name of the grid operator	
Contact at the grid operator	Name, phone, email, if known
Maximum available grid connection capacity at the site	kW / kVA; please state source or confirmation
Currently available connection capacity for the PowerCube	kW / kVA; if different from maximum capacity
Known grid restrictions	e.g. limited feed-in, time-variable load limits, connection reinforcement

Is a load profile analysis available? ☐ Yes, attached ☐ No ☐ Requested from grid operator

4 EXISTING CONNECTION INFRASTRUCTURE

Is a CEE 5/63 A socket available at the site? ☐ Yes ☐ No ☐ Unclear

Is a CEE 5/125 A socket available at the site? ☐ Yes ☐ No ☐ Unclear

Can a suitable CEE socket be installed at the site? ☐ Yes ☐ No ☐ Assessment required

Position of the existing / planned socket	Distance to installation area, cable routing
Fusing and supply line	A, cross-section, cable length, existing documentation
Free electrical capacity for PowerCube	kW / A; possibly depending on operating hours
Remarks / required electrical work	

5 PV SYSTEM AND SELF-GENERATED POWER USE

Is a PV system present at the site? ☐ Yes ☐ No ☐ Planned

PV capacity	kWp
Inverter capacity	kW / kVA
Annual generation	kWh/year, if known
PV capacity available for PowerCube	% of PV capacity or kW
Feed-in / self-consumption concept	e.g. self-consumption, full feed-in, surplus charging
PV monitoring / data access	System, interface, contact person

6 MEDIUM VOLTAGE, TRANSFORMER STATION AND UTILIZATION

Is there a medium-voltage transformer at the site? ☐ Yes ☐ No ☐ Unclear

Transformer rating	kVA
Current transformer utilization	% or kW/kVA; please state calculation basis
Maximum permissible additional load	kW / kVA, if known
Owner / operator of the transformer station	

Are maintenance/inspection documents available? ☐ Yes, attached ☐ No ☐ To follow

7

ENERGY MANAGEMENT AND SYSTEM INTEGRATION

Is there an energy management system into which the PowerCube must be integrated?

☐ Yes

☐ No ☐ Planned

Manufacturer / system name	
Interfaces / protocols	<i>e.g. Modbus TCP, OCPP, API, proprietary</i>
Purpose of integration	<i>Peak load limiting, PV optimization, reporting, billing, fleet control</i>
IT / network requirements	<i>LAN, cellular, VPN, firewall, data storage</i>
Contact for IT / energy management	<i>Name, phone, email</i>

8

PLANNED CHARGING POINTS AND POWERCUBE USE

How many charging points are currently envisaged? ☐ 2 ☐ 4 ☐ More than 4 ☐ Still open

Desired charging power per charging point	<i>kW</i>
Simultaneity of charging processes	<i>How many vehicles should charge in parallel?</i>
Prioritization	<i>e.g. certain vehicles first, minimum SoC, departure times</i>
Site operating hours	<i>e.g. 24/7, weekdays, shift operation</i>

9

VEHICLES AND CHARGING PROFILE — CURRENT FLEET / INITIAL PHASE

Vehicle fleet

No. / qty	Manufacturer	Type / model	Battery kWh	Max. charg. kW	Connector / standard	Quantity

Charging profile

Vehicle / group	Weekday(s)	Arrival	Departure	Energy kWh	Charg. kW	Remarks

10 FLEET PLANNING FOR THE NEXT 5 YEARS

Are further vehicle purchases planned within the next 5 years? ☐ Yes ☐ No ☐ Still open

Year / period	Manufacturer	Type / model	Battery kWh	Max. charg. kW	Quantity	Planned use

11 FINANCING AND CONTRACT MODEL

Which financing concept would you consider? ☐

Purchase ☐ Pay-per-use ☐ Leasing ☐ Still open

Is a purchase dependent on subsidy funding? ☐ Yes ☐ No ☐ Still open

Budget frame / commercial requirements	<i>optional</i>
Internal decision-making structure	<i>technical / commercial / management / procurement</i>

12 REQUIRED DOCUMENTS AND ATTACHMENTS

Document	Status	Remarks
Site plan / installation area plan of the site	☐ attached ☐ to follow ☐ n/a	
Photos of the planned installation site and the connection infrastructure	☐ attached ☐ to follow ☐ n/a	
Grid connection confirmation or details from the grid operator	☐ attached ☐ to follow ☐ n/a	
Load profile analysis / historical load profiles, if available	☐ attached ☐ to follow ☐ n/a	
Single-line diagram / electrical plan of the site	☐ attached ☐ to follow ☐ n/a	
PV data sheet, inverter data and generation profile	☐ attached ☐ to follow ☐ n/a	
Transformer documents and utilization details	☐ attached ☐ to follow ☐ n/a	
Data sheets of the vehicles to be charged	☐ attached ☐ to follow ☐ n/a	
Energy management requirements / IT security requirements	☐ attached ☐ to follow ☐ n/a
